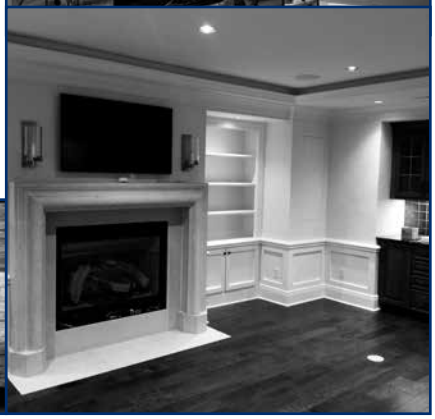
WHAT'S NEW in 2018

Live Edge Slabs

Live Edge Slabs are the natural cut of wood that keeps the unuique lines of the tree along one or two of its edges. We are currently stocking live edge slabs and are continually looking for other sizes and species to bring in. All slabs are unfinished.



Mantels

Whether your home is rustic, classic, contemporary or unique in some other way, St. Charles Hardwoods can custom make your **Mantel** to fit your needs. We do stock several mantels in our store, so come on in for your next mantel.

Butcher Block Counter Tops

Butcher Block Counter Tops can be a wonderful feature in your kitchen as well as add warmth, beauty and elegance to your home. Ask an associate for details.

St. Charles Hardwoods began serving the St. Louis area with quality hardwood products in 1988. Our knowledge of hardwood products is outstanding. We are known as the woodworkers' source for hardwood lumber, hardwood plywood, hardwood flooring and architectural mouldings. We also carry many different items such as: TruStile® interior doors, WM Coffman® stair parts, Ultra-Flex® mouldings, custom radius millwork and brass bar fixtures. St. Charles Hardwoods is widely know as the complete woodworkers' store.

GENERAL INFORMATION

STOCK MOULDING PROFILES

All mouldings shown in this catalog are stocked in poplar and red oak. Many items are also stocked in birch, cherry, pine and walnut.

RANDOM LENGTHS

All hard wood species are supplied in random lengths between 3' thru 16', depending on the item.

SPECIFIED LENGTHS

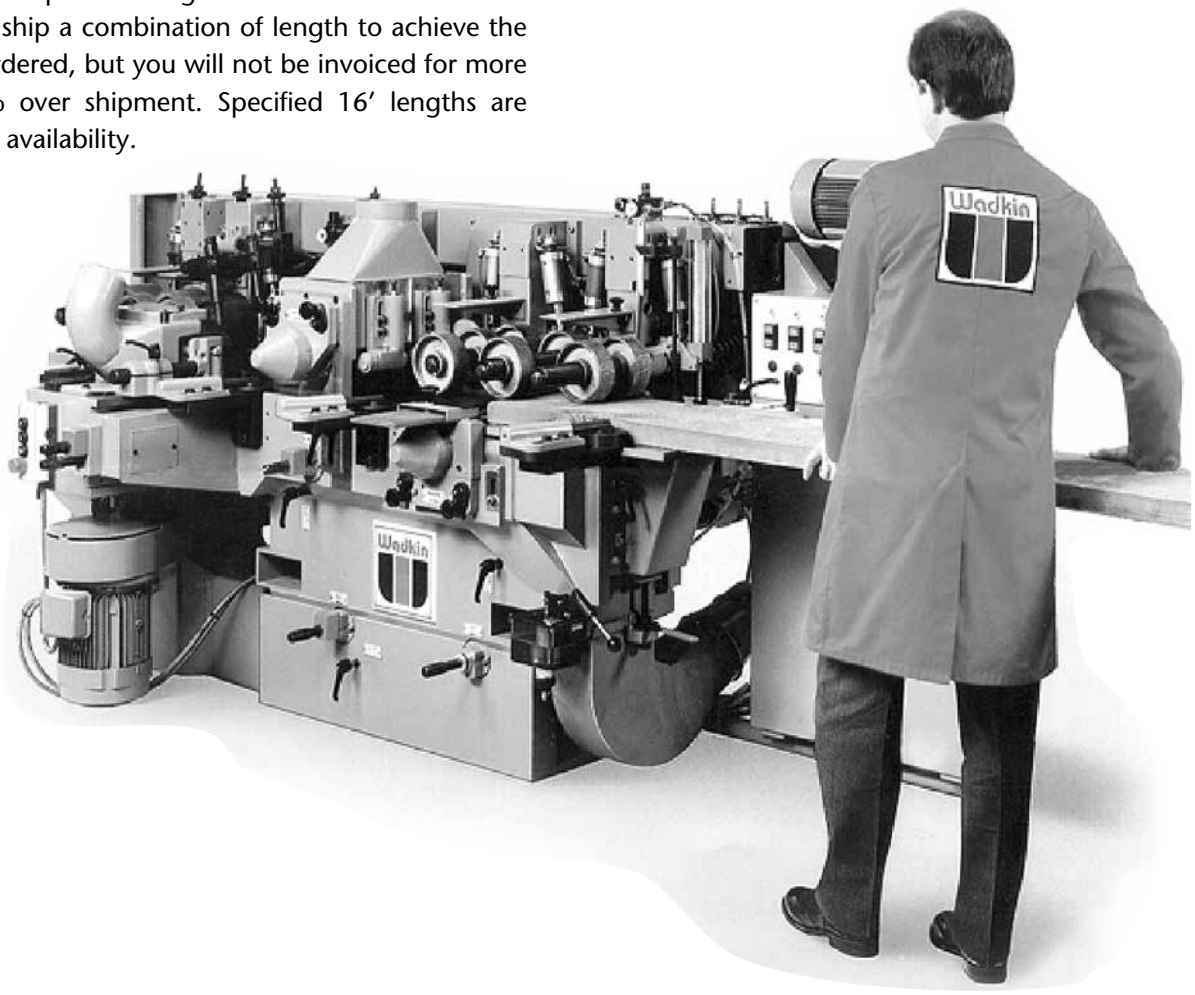
Specified lengths are available for an additional up-charge. These up-charges can vary depending on the item. When specified lengths are ordered we have the option to ship a combination of length to achieve the lengths ordered, but you will not be invoiced for more than 10% over shipment. Specified 16' lengths are subject to availability.

CUSTOM MOULDINGS

When requesting a quote on a custom moulding for which we do not have a knife, we need a dimensioned drawing or sample, along with the quantity and species required. Set up charges and knife grind charges may apply depending on the quantity.

Depending on the quantity, a set up charge may apply. When we run custom orders, a 10% overage occurs at times. Please take this into consideration when placing an order on custom runs.

All custom orders may require a deposit of one half down, when the order is placed.



ABOUT US

This is truly one of those American success stories. In 1988, Eddie and Jayne Wilson decided to take a small savings and buy some lumber and a truck of their own and began their career in wood. Eddie started by driving trucks and delivering lumber by himself, along with Jayne helping in the office with sales and accounting. Soon they were serving the St. Louis metro area with hardwoods and hardwood plywood. For some time Eddie and Jayne answered phones, filled and delivered orders and the rest is history. Soon Eddie and Jayne were staffing the company with other quality people, bringing outstanding knowledge and service that has brought unprecedented growth to St. Charles Hardwoods.

St. Charles Hardwoods is located at 3909 Mid Rivers Drive in St. Peters, Missouri. In 1996, St. Charles Hardwoods purchased and continues to own their mill in Bowling Green, Missouri, where they mill over 200 stock profiles and unlimited custom profiles of architectural mouldings in any species of wood.

St. Charles Hardwoods offers 16 species of domestic lumber and 22 species of exotic lumber; they are more than a lumber store. From the fine woodworker, to the furniture builder, to the cabinetmaker, to the homebuilder, St. Charles Hardwoods is the woodworkers' choice. When books, instruction videos, or advice are needed, St. Charles Hardwoods is well equipped with resources. Their staff is comprised of experienced people from several fields of woodworking. The atmosphere of their store is pleasing, so be sure to go in soon. It is the complete woodworkers' source in the area.

Thank you.

All of the staff at St. Charles Hardwoods

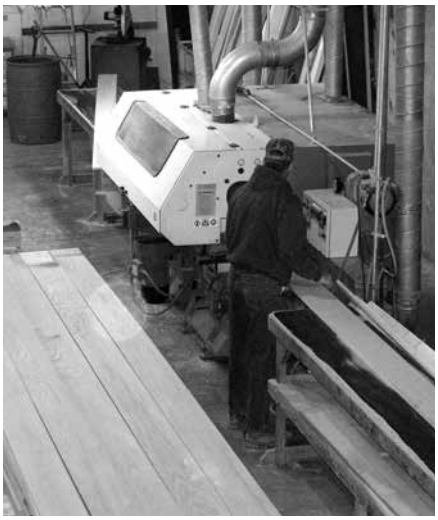
MILL SERVICES

BECAUSE WE OWN OUR OWN MILL, WE CAN SERVE YOU BETTER!

St. Charles Hardwoods' mill is located approximately 50 miles away from our St. Peters, Missouri location, in Bowling Green, Missouri. Sitting on over 20 acres, our mill provides us with many different ways we can accommodate your specific needs. Our mill provides all of our architectural mouldings and S4S material that we stock at our store.

Our mill has over 300,000 board feet of stocked lumber ready for use at any time. We have five moulders that run non-stop to keep up with production. We have our own knife grinding shop, allowing us to produce any custom knife for your specific need. We have a special moulder that produces any custom radius arches. We also have a glue-clamping machine to produce beautiful butcher-block tops.



ARCHITECTURAL MOULDING

From traditional base and casing to custom architectural profiles, we are capable of producing moulding in almost any hardwood or softwood species you may require.

INSTALLATION TIPS FOR HARDWOOD FLOORS

UNFINISHED & PREFINISHED FLOORING

Many flooring selections are available. Please call for more information.

Acclimation: Temperature and humidity levels are critical to wood tolerances. Storing wood for four or five days where it will be worked or installed will help eliminate many "winter time cracks." Hardwood flooring for example, left to acclimatize in a high humidity, or non-air conditioned areas, will expand before installation. This will cause the edges of adjoining pieces to result in cracks when it dries. Water is always present in wood. Wood responds to the amount of humidity in the air. In other words, water enters and leaves wood and changes its volume and properties.

Check for the following conditions and if they exist, correct them:
- Water under the house or excessive moisture under the house
- Insufficient ventilation under the house
- Wet subfloors
- Inadequate moisture retarder

To maintain moisture levels do not load or unload trucks in rain, snow or other excessively humid conditions.

CRAWL SPACE CONSTRUCTION - A ground cover of 4 - 6 mil polyethylene is essential as moisture retarder. Ventilation must be provided with no dead air areas.

CONCRETE SLAB CONSTRUCTION - Proper on grade construction requires both a vapor retarder between the gravel fill and the slab to prevent moisture entry through the slab, and a vapor retarder on top of the slab to prevent moisture form reaching the finished floor.

SUBFLOORS - With 3/4" thick strip flooring use either kiln-dried boards of No. 1 or No. 2 Common Pine or other dense Group #1 Softwood suitable for subfloors over wood.

HANDLING & STORAGE - Flooring should be stored in a dry, well ventilated warehouse. Recently manufactured flooring should be allowed to acclimate to the area.

BEFORE DELIVERY OF FLOORING - the building must be closed-in with outside windows and doors in place and sheetrock installed. all concrete, masonry and framing members, etc. should be thoroughly dry. Never pour concrete after flooring is delivered.

AFTER DELIVERY OF FLOORING - flooring should be broken-up into small lots and stored in the rooms where it will be installed. Allow 4-5 days for flooring to become acclimated to that particular job site. Temperature and humidity should be maintained at or near occupancy levels.

ARCHITECTURAL COLUMNS

STAIN & PAINT GRADE

St. Charles Hardwoods offers a complete line of wood and fiberglass columns. Architectural columns are available in stain grade for interior use, or finger jointed for exterior use. Stock columns are made of finger jointed pine and available in round or square plain or fluted. Column shafts are manufactured with patented machinery to assure the highest quality product available. Stain grades are available in Mahogany, Red Oak, Hard Maple and Cherry.
